### ABOUT THE AUTHOR

**Dr. Rajneesh Kumar Sharma, M.D. (Hom)** is a renowned practitioner of Uttarakhand, India. He is **CMD of Homoeo Cure & Research Institute** since 1994. He is also the founder of Hindi Vikas Kalyan Samiti, Kashipur JCs, Homoeo Cure & Research Institute etc.

Dr. Sharma is also famous for his literary expertise and his articles and cases are frequently published in magazines, newsletters, souvenirs and online journals. He has been honored with a number of awards including **Bhartiya Chikitsak Ratna Award 2007**, **Mother India Award for Udyog Pratibha 2007**, **Kashipur Gaurav Award 2005**, **Best International Feature Award 2003** etc. etc. Presently he is practicing at HCRC Pvt. Ltd, Kashipur- Uttarakhand (INDIA)

Dr. Ruchi Rajput is a dedicated and sparkling Homoeopath toiling hard to enrich Homoeopathic treasures. She is accompanying Dr. Rajneesh Kumar Sharma.

## PREFACE

There are innumerable notions about Homoeopathy in whole world. When such comments come into notice they compel one to cudgel his mind, who is responsible for creating all such false notions? After reflecting seriously on all such comments, I reached the conclusion that the fault is from both the sides, Homoeopathic physician and the patient.

## DRAWBACKS FROM THE PHYSICIAN'S PART

Homoeopathic physicians themselves are solely responsible. This responsibility is multi-pronged. Let us ask ourselves a few questions seriously and honestly:

- (1) **FAITH-** Do we have virtuous certitude in this esteemed system of healing by similia i.e. Homoeopathy?
- (2) **ORGANON OF MEDICINE-** Do we have learned principles of this healing art?
- (3) Do we correctly interpret the-
  - a. **THEORY OF INDIVIDUALIZATION-** Man in health and man in disease? Personalities of the individuals with respect to their healthy state and change in personality of each individual under the influence of diseases?
  - b. **MATERIA MEDICA-** The change in personality of each individual under the influence of each individual drug?
- (4) **REPERTORY-** Do we dare to put forth efforts to choose proper remedy according to its adaptability to the disease personality as per discipline of the Homoeopathy?
- (5) **PHARMACY AND PHARMACOLOGY-** Do we know about the sources of drug substances, methods of preparation of the medicines and about the proper doses?
- (6) **POSOLOGY-** Do we know how to decide precisely when to repeat the dose?
- (7) **SECOND PRESCRIPTION-** Do we know how to decide when it is proper time for the second prescription?
- (8) **RECORD KEEPING-** Do we keep proper record of each individual patient so that we may keep proper track on the progress and the changes taking place under our concern of each individual patient?
- (9) **CAUSA OCCASINALIS-** Do we have knowledge regarding patient's need for supplements like vitamins, minerals, electrolytes, fluids etc. and how to balance them in emergency?
- (10) **DIET AND REGIMEN-** Do we understand how to manage the case, with respect to the mode of diet, mode of living and the precautions to be observed so that the recovery may be faster?

## DRAWBACKS FROM THE PATIENT'S PART

The patient is not always faithful with physician. Here some questions can be put out to conclude-

- (1) Does the patient have full faith in treating physician?
- (2) Is the patient satisfied with qualification and achievements of the physician?
- (3) Is the patient able to understand his sufferings well and correctly interprets them in words so that the physician may make clear and right picture of the sufferings of the patient in his mind?
- (4) Is the language of the patient intelligible and palatable to the physician?
- (5) Is the patient fair and reveals all the facts and secrets about the sufferings to the physician?
- (6) Does the patient inform correctly about his past and family history?
- (7) Does the patient follows the instructions of the doctor faithfully and takes the medicine punctually as per advice of the physician and follow dietary restrictions if any?
- (8) Does the patient make punctual and regular follow-ups?

These are some important ones among myriad other questions, which require immense fascination to increase ones expertise in science of Homoeopathy. We should have thorough knowledge of different types of personalities, constitutions and temperaments. Some common personalities are explained as under-

### **CHARACTERISTICS OF A SALESMAN**

Determination

Inspiring

Trust

Passion

### **CHARACTERISTICS OF A NURSE**

Empathy- Compassion- Sympathy

Patience

Confidence

### **CHARACTERISTICS OF A DOCTOR**

Confident

Empathetic-Compassionate- Sympathetic

Humane

Personal

Forthright

Respectful

Thorough

### **CHARACTERISTICS OF A LEADER**

Mission

Vision and Goal

Competency

A strong team

Communication skills

Interpersonal skills

Inspiration

Ambition

### **CHARACTERISTICS OF AN ENTREPRENEUR**

- Own boss
- High energy
- Willingness
- Inspiring and energizing others
- Strong willed
- Ability to learn from failures
- Devoted
- Fiercely competitive
- A "never, never, never quit" attitude

### **CHARACTERISTICS OF A GOOD TEACHER**

- Good communicator
- Tempered
- A good sense of humour
- Punctual
- Fair attitude
- Learnt
- Dedicated, Meticulous - Careful
- Good leader and good friend

### **CHARACTERISTICS OF AN EXCELLENT ADMINISTRATOR**

- Censorious
- Attention to detail
- Ability to see the big picture
- Supporting
- Elasticity of the mind - willingness to try new things
- Lifelong learner
- Open and transparent
- Follows through with commitments

### **CHARACTERISTICS OF A COUNSELLOR**

Good communicator as well as good listener

Respectful

Kind, caring and understanding

Trustworthy

Relaxed and calm

Warm and approachable

### **CHARACTERISTICS OF A SOCIAL WORKER**

Empathy

Ethical

Patience and Listening Skills

Flexibility

### **CHARACTERISTICS OF ARTISTS**

Unconventional

Individualistic

Inventive

Driven

Visionary

Intuitive

### **CHARACTERISTICS OF A SCIENTIST**

Inquisitive

Explorative

Persistent

Creative

Analytical

By understanding the person, his occupation, temperament etc., his mental generals can easily be found. The cure is 100% if mentals are matched in the totality. Now the question arises, can these studies be arranged in some more reliable i.e. scientific way?

Yes, the following article demonstrates this in detail.

# CONSTITUTIONS AND HOMOEOPATHY

## ARTICLE OUTLINE

**Key Terms-** Constitution- Miasms- Temperaments- Types of Temperaments, Their Features, Miasmatic and remedial analysis, as well as their different combinations.

### CONSTITUTION

A person's constitution is made up of physical body and the physiological processes within it which are genetically based.

### GRAVOUGL'S CLASSIFICATION OF CONSTITUTIONS

Gravougl classified the constitution on the theory of excess or deficiency of certain elements in the tissues and blood. He postulated that every tissue breathes, lungs are the gate-ways and blood is the carrier. The tissues are ultimate recipients of oxygen taken in by the exchanges of gases inside the lungs.

He classified them in three groups-

### HYDROGENOID CONSTITUTION

It is characterized by the excess of Hydrogen and consequently water in tissues and blood. It corresponds to Hahnemann's Sycosis but in wider range. Periodicity and intermittent fevers come within its domain. He speaks of Thuja as the king remedy for Hydrogenoid constitution.

### OXYGENOID CONSTITUTION

It is characterized by the excess of Oxygen and exaggerated influence of Oxygen on the organism. It corresponds to Syphilis. Ulcers and chancres come within its domain.

### CARBO-NITROGENOID CONSTITUTION

It is characterized by the excess of Carbon and Nitrogen in tissues and blood of the organism. It corresponds to Psora.

To understand these clearly, we must first learn about the so called Miasms.

## MIASM

Miasms are the factors which work as inductors as well as catalysts to the reactions normally or abnormally occurring inside a living body.

They may behave like inductive factors to induce an abnormal reaction, or to alter a normally occurring reaction either positively or negatively.

In any of these conditions, miasms may disbalance the normal healthy equilibrium and initiate a disease process. This disease process continues to result in gross pathological changes i.e. alteration in the structures, functions and the termination of the body.

Origin of disease can be separated into two categories-

1. The exciting and fundamental causesand
2. The susceptibility of the physical constitution

Both are very closely related to each other.

It is necessary for a homoeopath to understand the nature of the exciting causes of acute diseases as well as the underlying fundamental cause of long lasting diseases, which is usually due to the chronic miasms.

Acute diseases are self-limiting disorders which have quick onsets, rapid progressions, and a tendency to develop an immediate crisis. Many of these acute diseases are actually acute exacerbations of the chronic states latent within the constitution that have been aroused by exciting factors.

The nature of chronic miasmic disease is slow and insidious in its onset and gradual in its progression. These negative transformations gradually increase until they bring on complex pathologies that eventually are the cause of premature old age and death.

The chronic miasms are the effects of infections or mutations that are non-self-limiting which cause considerable damage to the immune system, the vital force, and the constitution.

Hahnemann taught that the susceptibility to the exciting factors lies in the fundamental cause which is attributed to the chronic miasms.

## TYPES OF MIASMS

They are-

### FUNDAMENTAL MIASMS-

1. PSORA- It badly alters the natural reactions of a constitution tending to produce irritation, inflammation, and hypersensitivity.
2. SYCOSIS- It badly initiates and catalyzes constructive reactions tending to produce infiltrations, indurations, and over growths.
3. SYPHILIS- It badly initiates and catalyzes destructive reactions tending towards degeneration and ulceration.

### MIXED MIASMS-

4. PSEUDO-PSORA-It is the combination of Psora and Syphilis and badly catalyzes constructive as well as destructive reactions tending towards tubercles, fibrosis and suppuration. It is also called as Tubercular miasm.
5. CANCEROUS- It is the combination of all the three basic miasms and leads to the formation of worst forms of diseases, containing physiological mutations, deepest destructions and uncontrolled, unwanted growths.

## SIGNS AND SYMPTOMS OF MIASMS-

Each of the chronic miasms has its own characteristic signs that are an integral part of the totality of the symptoms. For example:

### *Physical constitution-*

**PSORA** tends to make the organism toxic, the skin unhealthy, and perverts the functions of the digestive and eliminative organs.

**PSEUDO-PSORA** tends to produce pipe stem bones, narrow chests, sunken cheeks and sparkling eyes.

**SYCOSIS** tends to cause heavy bones, water retention, over growth of tissue like gynaecomastia, hirsutism and slow metabolism.

**SYPHILIS** tends to cause congenital defects, asymmetrical bony structure, deformed teeth and the classic bull dog face.

### *Temperament-*

**PSORA** is full of pseudo-scientific, philosophical, political, religious ideas. They are self-expressive, talkative, and self-deceptive and may think they are full of genius yet seem foolish and impractical to others.

**PSEUDO-PSORA** is romantic, erotic, social, extroverted, cosmopolitan, erratic, optimistic, yet dissatisfied and always wants to change places, jobs, mates, etc.

**SYCOSIS** is pessimistic, a hard realist, skeptical (Doubtful), secretive, suspicious, jealous and has fixed ideas and hidden self-disgust.

**SYPHILIS** has a mixture of madness and genius with a deep sense of irony that leads to obsession with death and destruction. They become guilty, self-destructive, and end in idiocy, insanity or suicide.

### *Pains-*

**PSORA** pains are itchy, crawling, tickling, and burning

**PSEUDO-PSORA** pains are neuralgic, sharp, piercing, twisting, and stitching.

**SYCOSIS** pains are sudden, intense, spasmodic, crampy and colicky.

**SYPHILIS** pains are lacking for the condition present or are deep, aching, agonizing, and esp. < at night.

***Discharges-***

**PSORA** has fairly scanty, irritating, itchy discharges. Natural discharges ameliorate.

**PSEUDO-PSORA** has pussy, purulent, yellow, bloody, musty discharges. Epistaxis, axillary sweat or offensive foot sweat ameliorate.

**SYCOSIS** has pungent, brine-like, fishy odors with watery greenish or dirty brown discharges. Reappearance of suppressed normal discharges ameliorates.

**SYPHILITIC** miasm has very offensive, foul, putrid, smelly discharges. Discharge of pus ameliorates.

***Skin-***

**PSORA** is dry, rough, and unhealthy, every little injury becomes infected and the lesions are itchy and have scanty pus.

**PSEUDO-PSORA** is translucent, fine, smooth, bruises easily, and its lesions bleed easily and exude excessive pus.

**SYCOSIS** is full of warts, flecks, moles, growths, dark discolorations with over growth of hair-so called hirsutism.

**SYPHILITIC** skin has brownish red, or coppery color spots, eruptions that do not itch, and a tendency toward easy ulceration.

There are three factors that form a complete picture of a disease-

- 1- The etiology of a disease- to be known through Practice of Medicine.
- 2- The totality of the signs and symptoms- to be known through Case Taking.
- 3- The constitutional temperament of the patient- to be known by understanding the Homoeopathic Philosophy.

In Homoeopathy we often speak of the totality of the symptoms as the basis of selecting a remedy. But sometimes we forget to include the causative factors, miasms, and the physical constitution of the individual. Without them totality is not complete. Without complete Totality, simillimum remedy cannot be found. Without simillimum remedy, cure cannot take place.

### COMPOSITION OF CONSTITUTION

A person's constitution is composed of certain factors. These include the following constituents to make a personality.

### CONSTITUENTS OF CONSTITUTION

It is easy to learn the definition and types of constitution but too difficult to ascertain the correct constitution clinically. To decide one's constitution, the above said factors are made into detailed consideration. The physical built, his desires, aversions, modalities, aptitude, attitude, temperaments etc. all are to be inquired in detail and caustiously.

The constituents of a personality other than his temperament are easier to study and apply to recognize his constitution. But the most reliable and distinct factor to differentiate a person from another one is his Temperament. Other factors are also essential, but ascertaining the correct type of temperament may clearly and most reliably decide the type of personality for our purpose.

# CONSTITUTIONAL TEMPERAMENT

The mode of a constitution in which he replies to the nature is called his temperament.

## DEFINITION

- It indicates an individual's character, disposition and tendencies as revealed in his reactions; it also denotes the characteristic way in which an individual behaves especially towards others.
- disposition: usual mood; "he has a happy disposition"
- In psychology, temperament refers to those aspects of an individual's personality, such as introversion or extroversion, that are often regarded as innate rather than learned. [en.wikipedia.org/wiki/Temperament](https://en.wikipedia.org/wiki/Temperament)
- aspects of personality that exist at birth and are believed to be as a result of genetic influences. [www.tuition.com.hk/psychology/t.htm](http://www.tuition.com.hk/psychology/t.htm)
- A person's way of responding to the world. e.g. shy, bold, risk taking, and cautious. [www.ornl.gov/hgmis/publicat/genechoice/glossary.html](http://www.ornl.gov/hgmis/publicat/genechoice/glossary.html)

## HISTORY

### HISTORY AND DEVELOPMENT

Temperament theory originated in ancient Egypt or Mesopotamia, but it was Hippocrates (460-370 BC) developed it into a medical theory. He believed certain human moods, emotions and behaviors were caused by body fluids (called "humors"): blood, yellow bile, black bile, and phlegm.

Galen (AD 131-200) developed the first typology of temperament in his dissertation De temperaments, and searched for physiological reasons for different behaviors in humans.

He mapped them to a matrix of **hot/cold** and **dry/wet** taken from the Four Elements. In the ideal personality, the complementary characteristics or warm-cool and dry-moist were exquisitely balanced. Galen named "**sanguine**", "**melancholic**", "**choleric**" and "**phlegmatic**" after the bodily humors. Each was the result of an excess of one of the humors that produced, in turn, the imbalance in paired qualities.

Original Galen matrix:

	Wet	Dry
Hot	Air/blood	Fire/yellow bile
Cold	Water/phlegm	Earth/black bile

Basically, extroverts are "hot", introverts are "cold". People-focused are "wet", and task-focused are "dry". Task-focused people tend to be more "dry" in speech. People-oriented extroverts tend to be "polite".

He also had MODERATE points on the scale, between hot and cold, and warm and dry, yielding five "balanced" temperaments, including one in the center that is balanced in both scales.

In The Canon of Medicine, Avicenna (980-1037 AD) extended the theory of temperaments to encompass "emotional aspects, mental capacity, moral attitudes, self-awareness, movements and dreams.

#### DEVELOPMENT OF TEMPERAMENT

Temperament in Development During Early Childhood	
Developmental period	Temperament components
<b>Newborn</b>	Distress and soothability, activity, orienting and alertness (attention), approach-withdrawal
<b>Early infancy</b>	All of the above and smiling, laughter, vocalization, stimulus seeking and avoidance, frustration
<b>Late infancy</b>	All of the above and inhibition of approach, effortful control, fear
<b>Preschool years and beyond</b>	All of the above with continuing development of effortful control

#### DIFFERENT APPROACHES TO UNDERSTAND TEMPERAMENTS

## THE FOUR TEMPERAMENT TYPES

Each of the four types of humours corresponded to a different personality type.

### THE FOUR HUMOURS

**CHOLERIC**  
(Hot/Dry)

**MELANCHOLY**  
(Cold/ Dry)

**PHLEGMATIC**  
(Cold/ Wet)

**SANGUINE**  
(Hot/ Wet)

## OK CONCEPT

The familiar concept of "**I'M OK; YOU'RE OK**" (the expression being the example of the most "healthy" attitude) can thus be paired with the five temperaments-

*Sanguine*- "I'm OK; you're OK"

*Melancholy*- "I'm NOT OK; you're NOT OK"

*Choleric*- "I'm OK; you're NOT OK"

*Phlegmatic*- "I'm whatever; you're whatever"

*Supine*- "You' are OK"; "I' may be OK"

Galen classified temperaments as below-

### 1. SANGUINE- I'M OK; YOU'RE OK

QUICK, IMPULSIVE, AND RELATIVELY SHORT-LIVED REACTIONS. (HOT/WET)

#### A NATURAL SALES MAN (REGENERATED BY SOCIALIZATION)

Temperament	INCLUSION (Who is IN or OUT of the relationship)	CONTROL (Who maintains the POWER and makes the DECISIONS for the relationship)	AFFECTION (How emotionally CLOSE or FAR the relationship)
Melancholy	Everyone OUT, except for Exclusive Club	I do not control you, so please do not try to control me	Generally, emotionally FAR
Sanguine	Everybody IN (Come on in!)	Controls or being controlled according to SWING	Emotionally CLOSE
Choleric	Do not call me I'll call you; until then, OUT! (except for Exclusive Club)	I am the Boss!	Emotionally FAR unless I approach you for my purposes
Supine	Everybody IN but you must reach out and invite me!	You are the Boss!	Emotionally CLOSE, but you must reach out to me
Phlegmatic	Take me or leave me	Democratic Let's all be Boss!	Moderate Take it or leave it

**THE COMBINATIONS OF FOUR BASIC TEMPERAMENTS****1. SAN-CHLOR (PHOS. LACH. PODO. SULPH.) (VIZ. BROKER)**

Strongest extrovert

People-oriented

Enthusiastic- But with lack of organization of the Sanguine

Talkative

Hurtful-forgetfulness of the sanguine and the caustic nature of the choleric may make them hurtful without realizing it.

**2. SAN-MEL (NUX-V. IGN. PULS. ACON.) (VIZ. PLAYER)**

Highly emotional

Moody- Changes quickly

Self Reproaching

**3. SAN-PHLEG (SULPH. KALI-S. PHOS. CARC.) (VIZ. SOCIAL WORKER)**

Extrovert

Extremely happy

Carefree

Helping others

**4. CHLOR-SAN (PHOS. CARC. LACH. SULPH.) (VIZ. ARMY PERSONNEL)**

Strongest extrovert

Active and Purposeful

Fearless- They have high levels of energy.

Brilliant- Whatever his profession, his brain is always active and engaged.

Quick anger and Injurious- They get and give ulcers. He may leave people, including spouse and children, shell-shocked and resentful of their angry outbursts.

5. CHLOR-MEL (NUX-V. SUPH. NAT-M. ARG-N.) (VIZ. ADMINISTRATOR/ MANAGER)

Industrious-They are very industrious and capable.

Very competitive and forceful

Obstinate- Hard to please

Fastidious

Goes into details

6. CHLOR-PHLEG (NUX-V. KALI-S. ALOE. COFF.) (VIZ. CLERICAL STAFF)

Organized

Good planner

Vexed

7. MEL-SAN (CARC. GRAPH. LYC. PETR.) (VIZ. TEACHER)

Excellent communicator

Emotional

Fearful

8. MEL-CHLOR (NUX-V. LYC. FERR. PHOS.) (VIZ. LAWYER)

Perfectionist

Determined- They mix decisiveness and determination.

Difficult to please

Revengeful

9. MEL-PHLEG (ARG-N. ARS. NUX-V. CAUST.)(VIZ. LIBRARIAN/ ACCOUNTANT)

Organised

Easily discouraged

Fearful and anxious

Stubborn- They have rigid tendencies.

**10. PHLEG-SAN (PODO. LACH.NAT-C. CALC.) (VIZ. POLITICIAN)**

Happy

Social

Excellent administrators

Undisciplined

**11. PHLEG-CHLOR (PHOS. CARC. SULPH. DULC.) (VIZ. DOCTOR)**

Most active

Introvert

Excellent counsellor

Active listener

Practical

Helpful

Patient

Stubborn

Sedentary

Passive

**12. PHLEG-MEL (SIL. NAT-M. NUX-V. RUTA) (VIZ. MODEL)**

Gracious

Quiet

Negativism

## USE OF STUDY OF TEMPERAMENTS

### TO KNOWABOUT SELF–

Knowingself temperament can be an "eye-opening" experience. It may help in explaining why you do certain things and why you don't get along with certain others. You can use your knowledge of temperament to guide you in choosing vocations, affiliations, and friendships.

### TO GET ALONG WITH OTHERS –

Learning how to spot the temperament of others is invaluable. You can know for a choleric that you should not try and be "chatty" with him. If you see a phlegmatic you may understand why they seem quiet and reserved.

### TO KNOW THE WORK AND LIFE –

This is a key area of understanding temperament. There are so many people in life who are in jobs that do not match their temperament. A sangphleg may not make a good surgeon. A cholmel probably wouldn't be happy teaching kindergartners. Tests of temperament often include suggestions concerning career choices.

### RELATIONSHIPS –

Cholerics get impatient with sanguines. Melancholies think that phlegmatics "just don't care" about details. This can help each individual grow and develop or it can cause anger, resentment and separation. Understanding your temperament and your child's can affect parenting style. A melancholy child needs structure, organization and reassurance. A choleric child needs a big backyard and a large dog to take care of. A phlegmatic mother needs to be firm with a sanguine child.

## THE 125 BASIC TEMPERAMENT COMBINATIONS-

### PURE TYPES-

1. Melancholy-Melancholy-Melancholy (MMM)
2. Choleric-Choleric-Choleric (CCC)
3. Sanguine-Sanguine-Sanguine (GGG)
4. Supine-Supine-Supine (SSS)
5. Phlegmatic-Phlegmatic-Phlegmatic (PPP)

### THE I/C/A BLENDS-

1. "SANCHLOR"
  1. Sanguine-Choleric-Sanguine (GCG)
  2. Sanguine-Sanguine-Choleric (GGC)
  3. Choleric-Sanguine-Sanguine (CGG)
2. "SANMEL"
  4. Sanguine-Melancholy-Sanguine (GMG)
  5. Sanguine-Sanguine-Melancholy (GGM)
  6. Melancholy-Sanguine-Sanguine (MGG)
3. "SANPHLEG"
  7. Sanguine-Phlegmatic-Sanguine (GPG)
  8. Sanguine-Sanguine-Phlegmatic (GGP)
  9. Phlegmatic-Sanguine-Sanguine (PGG)
4. "CHLORSAN"
  10. Choleric-Choleric-Sanguine (CCG)
  11. Choleric-Sanguine-Choleric (CGC)
  12. Sanguine-Choleric-Choleric (GCC)
5. "CHLORMEL"
  13. Choleric-Melancholy-Choleric (CMC)
  14. Choleric-Choleric-Melancholy (CCM)
  15. Melancholy-Choleric-Choleric (MCC)
6. "CHLORPHLEG"
  16. Choleric-Phlegmatic-Choleric (CPC)
  17. Choleric-Choleric-Phlegmatic (CCP)
  18. Phlegmatic-Choleric-Choleric (PCC)
7. "MELSAN"
  19. Melancholy-Melancholy-Sanguine (MMG)
  20. Melancholy-Sanguine-Melancholy (MGM)
  21. Sanguine-Melancholy-Melancholy (GMM)
8. "MELCHLOR"
  22. Melancholy-Choleric-Melancholy (MCM)
  23. Melancholy-Melancholy-Choleric (MMC)
  24. Choleric-Melancholy-Melancholy (CMM)
9. "MELPHLEG"
  25. Melancholy-Phlegmatic-Melancholy (MPM)

- 26. Melancholy-Melancholy-Phlegmatic (MMP)
- 27. Phlegmatic-Melancholy-Melancholy (PMM)
- 10. "PHLEGSAN"
  - 28. Phlegmatic-Phlegmatic-Sanguine (PPG)
  - 29. Phlegmatic-Sanguine-Phlegmatic (PGP)
  - 30. Sanguine-Phlegmatic-Phlegmatic (GPP)
- 11. "PHLEGCHLOR"
  - 31. Phlegmatic-Choleric-Phlegmatic (PCP)
  - 32. Phlegmatic-Phlegmatic-Choleric (PPC)
  - 33. Choleric-Phlegmatic-Phlegmatic (CPP)
- 12. "PHLEGMEL"
  - 34. Phlegmatic-Melancholy-Phlegmatic (PMP)
  - 35. Phlegmatic-Phlegmatic-Melancholy (PPM)
  - 36. Melancholy-Phlegmatic-Phlegmatic (MPP)

### SUPINE BLENDS-

- 1. "SUPSAN"
  - 37. Supine-Sanguine-Supine (SGS)
  - 38. Supine-Supine-Sanguine (SSG)
  - 39. Sanguine-Supine-Supine (GSS)
- 2. "SUPCHLOR"
  - 40. Supine-Choleric-Supine (SCS)
  - 41. Supine-Supine-Choleric (SSC)
  - 42. Choleric-Supine-Supine (CSS)
- 3. "SUPMEL"
  - 43. Supine-Melancholy-Supine (SMS)
  - 44. Supine-Supine-Melancholy (SSM)
  - 45. Melancholy-Supine-Supine (MMS)
- 4. "SUPPHLEG"
  - 46. Supine-Phlegmatic-Supine (SPS)
  - 47. Supine-Supine-Phlegmatic (SSP)
  - 48. Phlegmatic-Supine-Supine (PSS)
- 5. "SANSUP"
  - 49. Sanguine-Supine-Sanguine (GSG)
  - 50. Sanguine-Sanguine-Supine (GGS)
  - 51. Supine-Sanguine-Sanguine (SGS)
- 6. "CHLORSUP"
  - 52. Choleric-Supine-Choleric (CSC)
  - 53. Choleric-Choleric-Supine (CCS)
  - 54. Supine-Choleric-Choleric (SCC)
- 7. "MELSUP"
  - 55. Melancholy-Supine-Melancholy (MSM)
  - 56. Melancholy-Melancholy-Supine (MMS)
  - 57. Supine-Melancholy-Melancholy (SMM)
- 8. "PHLEGSUP"
  - 58. Phlegmatic-Supine-Phlegmatic (PSP)

59. Phlegmatic-Phlegmatic-Supine (PPS)
60. Supine-Phlegmatic-Phlegmatic (SPP)

### THREE-WAY BLENDS-

61. Melancholy-Choleric-Sanguine (MCG)
62. Melancholy-Choleric-Phlegmatic (MCP)
63. Melancholy-Choleric-Supine (MCS)
64. Melancholy-Phlegmatic-Choleric (MPC)
65. Melancholy-Phlegmatic-Sanguine (MPG)
66. Melancholy-Phlegmatic-Supine (MPS)
67. Melancholy-Supine-Choleric (MSC)
68. Melancholy-Supine-Phlegmatic (MSP)
69. Melancholy-Supine-Sanguine (MSG)
70. Melancholy-Sanguine-Choleric (MGC)
71. Melancholy-Sanguine-Phlegmatic (MGP)
72. Melancholy-Sanguine-Supine (MGS)
73. Choleric-Melancholy-Phlegmatic (CMP)
74. Choleric-Melancholy-Sanguine (CMG)
75. Choleric-Melancholy-Supine (CMS)
76. Choleric-Phlegmatic-Melancholy (CPM)
77. Choleric-Phlegmatic-Sanguine (CPG)
78. Choleric-Phlegmatic-Supine (CPS)
79. Choleric-Supine-Melancholy (CSM)
80. Choleric-Supine-Phlegmatic (CSP)
81. Choleric-Supine-Sanguine (CSG)
82. Choleric-Sanguine-Melancholy (CGM)
83. Choleric-Sanguine-Phlegmatic (CGP)
84. Choleric-Sanguine-Supine (CSP)
85. Phlegmatic-Melancholy-Choleric (PMC)
86. Phlegmatic-Melancholy-Sanguine (PMG)
87. Phlegmatic-Melancholy-Supine (PMS)
88. Phlegmatic-Choleric-Melancholy (PCM)
89. Phlegmatic-Choleric-Sanguine (PCG)
90. Phlegmatic-Choleric-Supine (PCS)
91. Phlegmatic-Supine-Melancholy (PSM)
92. Phlegmatic-Supine-Choleric (PSC)
93. Phlegmatic-Supine-Sanguine (PSG)
94. Phlegmatic-Sanguine-Melancholy (PGM)
