## Origin of word

From the Latin formicare meaning to creep like an ant. L. formica, ant.

## Synonyms

Delusions of parasitosis – DP, speed bumps, meth sores, crank bugs, deadness, formication, numbness, paraesthesia, prickling, sensation, tingle, tingling, dermatozoic hallucination, insect hallucination, formicative hallucination, Ekbom’s syndrome.

## Definition

Formication, essentially a form of paraesthesia or tactile hallucination (Psora), is an abnormal subjective cutaneous sensation similar to that of insects crawling over or within the skin, experienced spontaneously in the absence of stimulation (Psora).

## Causes

Formication is a precise form of the general set of abnormal skin sensations known as paraesthesias and tactile hallucinations (Psora). It is related with numerous disorders- physical or psychological side effect of substance abuse (Psora), diabetic neuropathy (Psora/ Syphilis), diseases of the spinal cord and peripheral nerves (Psora/ Syphilis/ Sycosis), menopause, allergies (Psora/ Syphilis), skin cancer (Psora/ Syphilis/ Sycosis), herpes zoster (Psora/ Syphilis/ Sycosis), syphilis (Syphilis), Lyme disease (PSora/ Sycosis) and extreme alcohol withdrawal with delirium tremens (Psora/ Syphilis).

Formication can also sometimes be experienced during high fevers (Psora/ Sycosis). Itching, tingling and formication often occur when surfacing from a dive or during ascent to altitude (Psora).

This is a common side effect of cocaine, amphetamines, or crystal meth (metamfetamine, meth, ice, crystal, glass, tik, N-methylamphetamine, methylamphetamine, and desoxyephedrine) (Causa occasionalis/ Psora).

Formication is also a side effect of many drugs like - Ritalin, Adderall and Lunesta (Causa occasionalis/ Psora).

## Pathophysiology

Substantial stimulant use reasons an upsurge in body temperature and increased blood flow to the skin to counteract the hyperthermia (Psora/ Sycosis). Sweat is produced that contains Lysozyme which additionally increases blood flow (Psora/ Syphilis). As the sweat evaporates, it removes the protective oils on the skin. This situation, joint with the toxins released from the skin, also dehydrates the dermal layer creating an itchy sensation on the nerve endings (Psora).

## Types

Formicative hallucinations are classified as –

### Tactile hallucinations

A hallucination of touch is called tactile hallucination. This is a sensation of physical contact with an object that isn't there.(Psora)

### Paraesthesias

Any subjective sensation, experienced as numbness, tingling, or a pins and needles feeling is called paraesthesia. These often fluctuate according to such influences as posture, activity, rest, oedema, congestion, or underlying disease. When experienced in the extremities, it is sometimes identified as acroparaesthesia. (Psora/ Sycosis)

## Clinical picture

Formication may sometimes cause feelings of itchiness, tingling, pins and needles, burning, or even pain (Psora). If the people anguished from formication, particularly if they are delirious or intoxicated, pick at, scrap or dig at their skin with fingernails or some instrument, secondary infection occurs and permanent scarring may occur. Occasionally, sepsis may appear (Psora/ Syphilis).

Sometimes, liable individuals who preoccupy on this sensation may develop delusional parasitosis, becoming persuaded that this sensation is being caused by actual insects, despite repeated guarantees as there was nothing real (Psora/ Syphilis). There have been some cases where people have commit suicide over this concept, as well as cases where people maimed themselves trying to rid themselves of these imaginary bugs (Syphilis/ Psora).

## Differential Diagnosis

### Ekbom Syndrome

This is a type of formicative hallucination and may also be accompanied by visual hallucinations of insects, which may be regarded by the affected individual as confirmation of an actual bug infestation. (Psora)

### Chronic tactile hallucinosis

This is a syndrome characterized by formicative hallucinations, parasitic or other dermatozoic delusions, and a chronic course which occurs mainly in women of 50 years of age and older. (Psora/ Syphilis)

## Cocaine bugs

When formicative hallucinations are due to the chronic use of cocaine, they are called cocaine bugs and this sign is termed Magnan's sign, or Magnan– Saury's sign.

## Crank bugs

These occur due to excessive use of amphetamine.

## Tinel's sign

It is a tingling sensation in the distal end of a limb when percussion is made over the site of a divided nerve. It indicates a partial lesion or the beginning regeneration of the nerve.

## Treatment

### Main Homoeopathic remedies for formications-

Rhus-t > Plat > Sec > Nux-v > Acon > Colch > Sep > Thuja > Agar > Arn > Caust > Phos > Zinc > Puls > Calc > Alum > Ph-ac > Ars > Kali-c > Lach > Spig > Nat-c > Bar-c > Carb-v > Chin > Rhod > Mez > Lyc > Merc > Laur > Con > Sabad > Spong > Nat-m > Arg-met > Arund > Bell > PsorRan-b > Mag-m > Ign > Cocc > Sil > Staph > Tarent > Dulc > Chel > Graph > Ran-s > Aesc > Ambr > Hyper > Plb > Cal-p > Nit-ac > Cham > Ant-t > Am-c > Bry > Croc > Verat > Berb > Arg-n > Canth > Sul-ac > Am-mApis > Colo > Hep > Pic-ac > Camph > Borx > Sabin > Osm > Aloe > Cadm-s > Nux-m > Mang > Ferr > Grat > Caps > Crot-t > Agn > Cist > Stann > Urt-u > Bov > Dros > M-aus > Crot-c > Pall > Tab > Carl > Cycl > Med > Cann-s > Carbn-s > Brom > Hist > Sel > Teucr > Calc-s > Calad > Mur-ac > Ol-an > Seneg > Nat-s > Kalm > Mag-c etc.

### Short Repertory of Formications

ABDOMEN – FORMICATION aloe ars. calad. calc-p. calc. camph. carb-v. caust. colch. coloc. crot-t. cycl. **Dulc.** mag-m. **Nat-c.** nat-sil. nux-v. paeon. pall. petr. pic-ac. **PLAT.** puls. stann. tritic-vg. zinc.

ABDOMEN - FORMICATION, crawling acon-c. aesc. aloe alumn. ant-t. ars. asaf. bell-p. calad. calc-p. calc. camph. carb-v. caust. chel. chin. colch. coloc. crot-t. cycl. **DULC.** euph-a. grat. ign. iod. mag-m. merc. **NAT-C.** nux-v. oena. paeon. pall. petr. pic-ac. **PLAT.** plb. puls. seneg. stann. sulph. **THUJ.** zinc.
